Chantilly Lace

Jenny Dina Kirschner of [JDK Interiors](#) relies on Benjamin Moore's Chantilly Lace when she's looking to brighten a space. "It's a very easy white paint color to work with in nearly any room, with any type of light. It's my go-to when I need crisp, clean walls with absolutely no undertones."

Steam

"To soften a room, I use Benjamin Moore's Steam," says Kirschner. "No matter the time of day or type of light, it reads as a more creamy, warm white without the yellow undertones that many other warm white paint colors have."
